

AKASH PURWAR

Senior Software Engineer · React.js · Redux · Node.js · MCP & AI Prompting · Playwright

Noida, India | +91 8860963377 | purwarakash@gmail.com | [LinkedIn](#) | [LeetCode](#)

SUMMARY

Senior Software Engineer with 5+ years building consumer-facing web platforms in React, with recent focus on AI-assisted engineering workflows — including designing MCP server integrations for design handoff, QA automation, and sprint orchestration. Contributes to frontend architecture and performance decisions alongside senior engineers, and is known for translating ambiguous product goals into working, well-tested systems. Actively mentors junior engineers on React architecture and best practices.

EXPERIENCE

Senior Software Engineer | Bold Technology Systems Pvt. Ltd. | Jan 2024 – Present

- Contributed to the frontend architecture for LiveCareer and ResumeNow, high-traffic consumer platforms, partnering with senior engineers and leads on scalability and performance decisions.
- Built and matured prompt-engineering workflows and developed three MCP (Model Context Protocol) server integrations — Figma-to-HTML, Playwright-based automated QA, and Jira sprint orchestration — cutting manual design-handoff and QA effort.
- Redesigned core rendering and data-loading strategy using advanced memoization, code-splitting, and lazy-loading, improving page-load performance by ~15%.
- Engineered caching and error-handling layers that reduced production API failure rates by ~20%, later adopted as a reference pattern by other teams.
- Supported 90% on-time sprint delivery across cross-functional teams by tightening estimation and dependency planning with product and design stakeholders.
- Helped raise frontend code quality by driving stronger code review practices and testing coverage, contributing to a measurable drop in regressions.
- Actively mentor junior engineers on React architecture and performance best practices.

Software Engineer | Cybage Software Pvt. Ltd. | Sep 2020 – Dec 2023

- Led delivery of the Universal Music Group Catalogue Explorer (React, Redux Toolkit) and the Fictiv manufacturing platform (React, GraphQL, CI/CD, SonarQube) as a key frontend owner on both engagements.
- Migrated critical legacy JavaScript modules to TypeScript, materially improving runtime stability and cutting production errors.
- Designed GraphQL and REST integrations with a strong focus on performance tuning and QA rigor, reducing post-release defects by 25%.
- Partnered directly with backend, QA, and design teams inside enterprise CI/CD workflows to consistently ship on aggressive client timelines.

SKILLS

- Frontend Engineering: React.js, Next.js, Redux Toolkit, TypeScript, JavaScript (ES6+), HTML5, CSS3
- Backend & APIs: Node.js, GraphQL (Apollo), REST APIs, PostgreSQL
- CS Fundamentals: Data Structures & Algorithms (DSA), System Design, Object-Oriented Design
- Performance & Architecture: Web Performance Optimization, Micro-Frontend Architecture, Caching Strategy, Rendering Optimization, Web Accessibility (a11y)
- Testing & DevOps: Jest, React Testing Library, Playwright, Docker, CI/CD (Jenkins, GitHub Actions), Git, SonarQube
- AI & Automation: MCP (Model Context Protocol) Servers, Prompt Engineering, AI Agent Orchestration, LLM-Assisted Workflows
- Delivery & Collaboration: Agile/Scrum, Code Review, Technical Mentorship, Cross-Functional Stakeholder Management

EDUCATION

PG Diploma in Advanced Computing (CDAC) — Sunbeam Institute of Information Technology, Karad | 2020

B.Tech in Computer Science — University of Petroleum and Energy Studies, Dehradun | 2015 – 2019
